

MMC Module

- Information completely customizable in the same screen of the EGM.
- Interface by standard SAS protocol in all EGMs.
- Provide integration with Online, TI.TO and Cash-less systems.
- Provide information on the Club Vip loyalty system with a modern and unique aesthetic in the market.
- Supports local LCD type 6.2 ", for machines without touch screen available.
- Remote feeding. Energy for the same "PoE" data cable.
- Limited capacity of expansion of applications and advanced multimedia functions:
 - Streaming of video.
 - Banner advertising on screen.
 - Output of audio by speakers and / or headphones with intercom.
 - Teleconference.

The MMC module is a device installed in game machines, allowing the integration of the same with the system On-line.

It also has the ability to intercept the video and the touchscreen of the machines and add your own information on the same screen. This gives rise to several applications, such as the addition of customizable menus, buttons to request promotions, advertising banners, etc.
